

Final Project Status Report

Project Name: PropPulse

07/02/2024 – week 2

- On Track: Project is on schedule
- At Risk: Milestones missed but date intact

Issues:	<ul style="list-style-type: none">● Working with docker, Kubernetes and minikube – in case of failure the alternative is another deployment method (cloudways, google cloud ...)
Milestones accomplished 29/01/24 – 07/02/24:	<ul style="list-style-type: none">● Code and design – Almost done - Aleen and Rimah● Project plan and division of tasks – Bahaa● Server monitor – Grafana/Prometheus – Already in use prior the starting of the final project
Milestones planned this week, but not achieved with variance:	<ul style="list-style-type: none">● Automated deployment - Bahaa
Milestones planned for next week:	<ul style="list-style-type: none">● Monitoring and logging – Jalal and Raafat● Automated Deployment – to be discussed in case of failure this week
Areas for discussion	Lack of experience in working with clusters and containers and not properly understanding their core concepts
Last week's issues forwarded to this week:	Automated deployment using Github, Docker, Minikube and Kubernetes – Bahaa
